

VERLUMA

LIGHT · BUILD · INSPIRE

Electrical and lighting solutions inspired by modern living. Guided by our brand promise — **Light Build Inspire** — we create switches, sockets, and power products where quality, safety, and design excellence come together.

Three Distinctive Series

Each series is carefully crafted to meet different aesthetic and functional needs, from essential value to premium finish.

Eco Series

Classic white finish. Reliable performance at an accessible price point. Perfect for value-conscious projects without compromising quality.

SoftMatte Series

Available in white, grey, and gold. Features premium soft-touch coating for an elevated tactile experience. Ideal for design-forward interiors.

DualMatte Series

Offered in black, white, and grey. Contemporary dual-finish design with sophisticated matte texture. Perfect for modern minimalist spaces.

Premium Internal Construction for Unmatched Safety & Durability

Every Verluma switch starts with exceptional engineering at its foundation. We prioritize structural integrity and safety from the inside out.

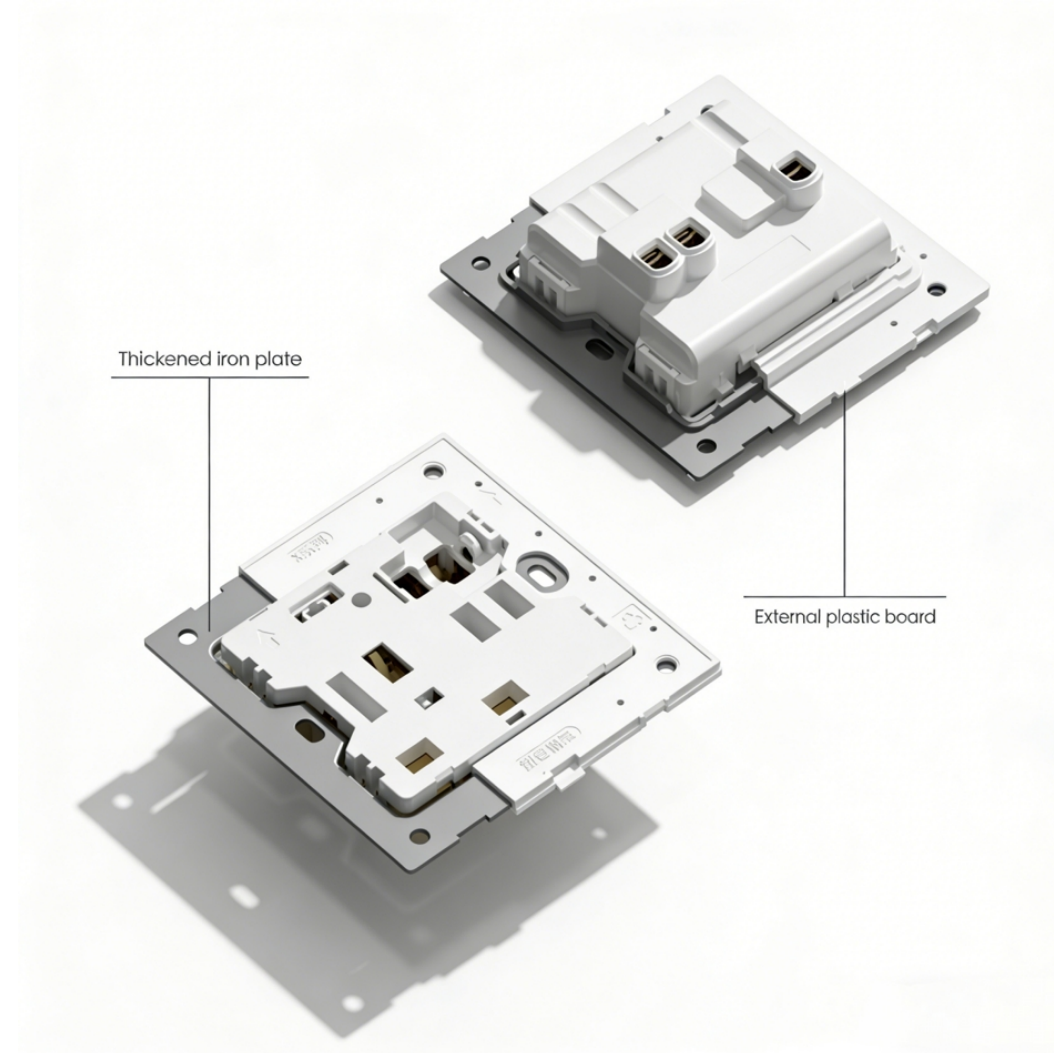

Key Features:

Thickened Iron Plate

Reinforced mounting base for enhanced stability and anti-deformation performance.

External Plastic Board

Made of flame-retardant PC material, meeting high safety standards for electrical components.

Precision Engineering Meets Premium Material Selection

We engineer every component to deliver exceptional durability, safety, and user experience.

Key Features:

Flame-Retardant PC Panel: All panels use high-grade flame-retardant PC plastic for superior safety.

Special Spray Coating: The two skin-touch series feature a unique spray process for a soft, matte finish.

Composite Silver Contacts: All switches are equipped with composite silver contacts for reliable switching and reduced wear.

Modular Design: Detachable components simplify installation and maintenance, ensuring flexibility for various applications.
